ADENEYE ADEDAMOLA OLUWAFEMI

Hull, United Kingdom | adeneyeadedamola200@gmail.com | linkedin.com/in/adeneye-adedamola-85aa47198

PROFILE

MSc AI and Data Science student at the University of Hull with a BSc in Computer Science (Second Class Upper). I have over two and a half years of experience as an IT Support and Web Manager, looking after a company website, CRM systems and day-to-day IT support. I work with Python, SQL and machine learning, and I recently built and launched my own web app with a cloud database and a live job search agent. I am looking for a data, IT support or web role where I can solve practical problems, support users and keep growing my technical skills.

WORK EXPERIENCE

IT Support and Web Manager **Aug 2023 to Mar 2026**
W.O Consult

- Managed and maintained the company WordPress website, keeping content and functionality up to date.
- Administered the Salesforce and LeadSquared CRM systems that tracked the client pipeline from enquiry to enrolment.
- Provided remote IT support to staff, resolving technical issues so daily operations kept running.

EDUCATION

MSc AI and Data Science **Expected 2027**
University of Hull, United Kingdom

- Modules include Applied AI, Big Data and Data Mining, and Data Fundamentals.
- Research project on AI adoption in research, supervised by Dr Daniel Farrow.

BSc Computer Science **2023**
Ladoke Akintola University of Technology, Nigeria

- Grade: Second Class Upper (2:1)

TECHNICAL PROJECTS

Job Hunt Tracker and Job Search Agent **Oct 2026**
Personal Project, live web app

- Built and launched a web app to log job applications, feedback and outcomes, with dashboards for the application funnel, feedback trends and weekly targets.
- Set up a Supabase (PostgreSQL) cloud database with secure email sign-in, using Row Level Security so only the owner can edit and approved viewers get read-only access.
- Added a job search agent: a serverless function that calls the Reed and Adzuna job APIs, removes duplicate adverts and scores each job against my skills, flagging senior or clearance-only roles.
- Hosted on GitHub Pages as an installable web app with light and dark modes, built with HTML, CSS and JavaScript.

Researchers' Evaluation of Agentic AI Across the Research Lifecycle **Sep 2026 to Present**
MSc Research Project, University of Hull

- Analysing published survey datasets on agentic AI in research, using NLP, pattern mining and clustering to group researchers by attitude.
- Identifying the opportunities, limitations and concerns that shape AI adoption, to produce evidence-based recommendations.

Sentiment Classification of Customer Reviews (NLP) **2026**
Applied AI Module, University of Hull

- Built and compared four models (Naive Bayes, Logistic Regression, Simple RNN and LSTM) to classify Amazon kitchen product reviews as positive or negative.
- Engineered TF-IDF and GloVe embedding features and tuned each model in a seeded, reproducible Jupyter pipeline.
- Best model, Logistic Regression, reached an F1 score of 0.830 and ROC-AUC of 0.921.
- Diagnosed and fixed technical faults, including a data extraction bug and an embedding masking flaw in the LSTM.

UK Road Accident Data Mining and Forecasting **2026**

Big Data and Data Mining Module, University of Hull

- Queried a Department for Transport road accident SQLite database with SQL and Python to find patterns by hour, day, vehicle type and severity.
- Implemented the Apriori association rule algorithm from scratch and applied K-means clustering to accidents in Hull, Humberside and the East Riding of Yorkshire.
- Built weekly and daily time series forecasts for three police forces and the 30 busiest local areas in Hull, then turned findings into road safety recommendations.

AI Crop Health Segmentation System (Design Proposal) **2026**

Applied AI Module, University of Hull

- Designed a computer vision solution for a UK farming co-operative scenario, with a ResNet-18 CNN as the baseline, plus transfer learning, focal loss and sliding-window inference.

SKILLS

Programming and Data: Python (pandas, scikit-learn, TensorFlow), SQL (PostgreSQL, SQLite), Jupyter Notebook

Machine Learning and AI: Naive Bayes, Logistic Regression, CNN, RNN, LSTM, transfer learning, model tuning and evaluation (F1, ROC-AUC)

NLP and Data Mining: TF-IDF, GloVe embeddings, sentiment analysis, Apriori association rules, K-means clustering, time series forecasting

Web Development: HTML, CSS, JavaScript, WordPress, REST APIs, Supabase, GitHub and GitHub Pages

IT Support and Systems: Remote IT support, troubleshooting, Salesforce, LeadSquared CRM

Professional: Stakeholder relationships, presenting technical work, delivering to deadlines

CERTIFICATIONS AND ADDITIONAL INFORMATION

- Professional Certificate in Full Stack Development
- British Council Counsellor Certificate
- Digital content creator since 2020: film, edit and publish sport content on TikTok and Instagram, using analytics to adjust content based on performance.
- Digital Content Creator for Pleasant Glow since 2023, creating content and managing its digital presence.
